Location: Chennai, India.

Professional Summary

Full Stack Developer with 4+ years of IT experience specializing in building responsive, user-friendly, and scalable web applications. Proficient in ReactJS, JavaScript, HTML5, CSS3, Java, and Node.js, with strong expertise in both frontend and backend development. Skilled in REST API integration, Git, Docker, application deployment, debugging, and web application validation. Experienced in automation testing and troubleshooting, focused on delivering reliable, maintainable, and high-quality software solutions. Delivered an enterprise reliability platform with 99.9% uptime

CORE SKILLS

- Programming Languages: JavaScript (ES6+), HTML5, CSS3
- Frontend Development: React.js, Next.js, Material UI
- State Management: Redux, Redux Toolkit, Zustand, Recoil, MobX
- Backend & Server-Side: Node.js, Express.js, REST APIs, JSON
- Databases: MongoDB, MySQL.
- Build Tools & Development Environment: Webpack, Vite, npm, Node.js
- Web APIs: Fetch API, Local Storage, Canvas API, Web Workers
- DOM & Browser Technologies: DOM Manipulation, Event Handling, Dynamic Element Creation/Modification, Event Delegation
- API Integration: RESTful API Integration, JSON Parsing.
- Version Control & Development Tools: Git, GitHub, GitLab, VS Code, CodeSandbox.

Experience

Associate Software Engineer – Full Stack Development & DevOps Apr 2024 – Present

Azbil India Pvt Ltd | Chennai, India

Project: DevOps Automation & Service Reliability Platform

- Architected and managed DevOps workflows for an enterprise-level service reliability platform, consistently maintaining
- 99.9% system uptime and guarantee strict SLA compliance.
- Designed and optimized automated CI/CD pipelines using Jenkins and Git, accelerating software delivery speeds and
- reducing deployment times by 40%.
- Orchestrated, maintained, and deployed containerized enterprise microservices on Kubernetes; conducted deep-dive pod troubleshooting, performance optimization, and log analysis.
- Provisioned, configured, and hardened scalable AWS cloud infrastructure including EC2, Elastic Load Balancers (ELB), IAM policies, custom VPCs, and Security Groups for critical production workloads.
- Engineered scalable RESTful APIs utilizing Node.js, Express.js, and MongoDB to drive underlying platform configurations, audit logging, and data persistence layers.
- Built proactive monitoring and telemetry architectures with Prometheus and CloudWatch to track and alert on transaction-critical cloud operations.
- Authored customized Shell scripts to automate recurring system maintenance and operational tasks, mitigating manual intervention by 60%.
- Collaborated transparently across Dev, QA, and Ops squads to manage production deployments, zero-downtime releases, and change management procedures.

DevOps Engineer — Infrastructure Support Associate May 2023 – Mar 2024

ISS India Pvt. Ltd. | Chennai, India

Project: Automation Infrastructure Support & Operations

- Delivered robust L2 infrastructure supports core automation systems, driving proactive environmental monitoring and preventive server maintenance routines.
- Managed, synchronized, and configured environments across DEV, UAT, and PROD layers, successfully eliminating environmental drift and establishing architectural parity.
- Triageed, investigated, and resolved multi-tier technical incidents managed through Jira and ServiceNow, resulting in a significantly reduced Mean Time to Resolution (MTTR).

- Authored detailed technical runbooks, SOPs, and system documentation to bridge knowledge gaps and compress engineering onboarding cycles.
- Administered production Linux servers, applying patches, user access controls, and diagnosing network infrastructure performance anomalies.

Project Engineer Aug 2018 – Jan 2020

Shabari Facility Services Pvt. Ltd | Chennai, India

Project: Honeywell Interfaces Automation

- Supervised and maintained extensive Building Management Systems (BMS) infrastructure utilizing Honeywell automation platforms across HVAC, Fire Safety, and Access Control components.
- Commanded real-time incident response workflows for critical telemetry and infrastructure alarms, ensuring uninterrupted system availability and rapid recovery.
- Executed thorough reliability engineering tasks and preventive maintenance on hisgh-value hardware systems.
- Programmed and automated daily infrastructure health checks and operational KPI reporting for management reviews.
- Drafted strict compliance documents, operational SOPs, and system upgrades strategies in alignment with corporate energy optimization goals.

Education

Bachelor of Science (B.Sc.) | Electronics & Communication Science
Alpha Arts and Science College, Chennai.

Jun 2020 - April 2023
Score: 81%

Diploma | Electrical & Electronics Engineering
Excel Polytechnic College, Pallakkapalayam.

Jul 2014 – April 2017
Score: 70%
